## Vidro de quartzo Philips com tecnologia anti-UV para um excelente desempenho de iluminação

**Todas as nossas lâmpadas halógenas e xenon são feitas com vidro de quartzo anti-UV de alta qualidade**

• **Luz mais poderosa**

O vidro de quartzo de alta resistência permite uma pressão maior dentro da lâmpada e assim gerar uma luz mais poderosa.

• **Melhor resistência**

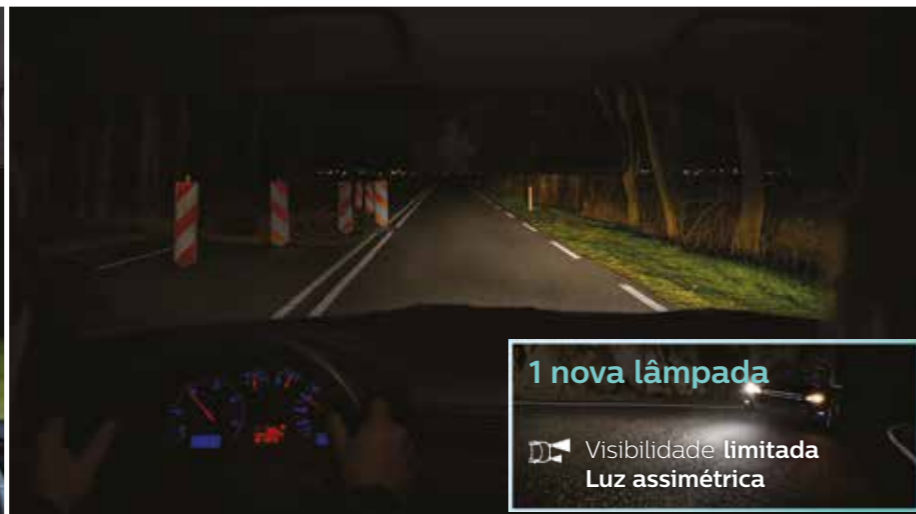

As lâmpadas de vidro de quartzo Philips (filamento a 2 650 ° C e vidro a 800 ° C) são capazes de resistir a graves choques térmicos.

• **Proteção ideal contra os raios ultravioleta**

Todas as lâmpadas Philips de vidro de quartzo também oferecem um escudo UV para proteger as modernas óticas de plástico dos prejudiciais raios ultravioleta.

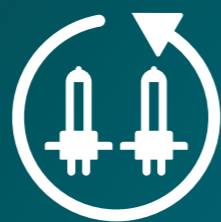

# Troque as lâmpadas em pares

Eficiência para você, segurança para seus clientes

# Nossa solução pró-ativa contra a pirataria das lâmpadas de Xenon

Lâmpadas de Xenon falsificadas têm ficado cada vez mais comuns em vendas online e tradicionais. Essas lâmpadas falsificadas são imitações pobres com qualidade baixa. Comprar, vender ou ter produtos falsificados é ilegal.

Para proteger nossos clientes e consumidores dos produtos falsificados, nós criamos uma solução usando exclusiva tecnologia. O certificado de autenticidade Philips (COA) está disponível em todas as novas embalagens de Xenon que comprar.

Utilizando o código de segurança, assim como outros elementos de segurança, profissionais poderão checar a autenticidade dos produtos em uma plataforma de internet segura. Profissionais podem também escanear o código QR e ir para o endereço [www.philips.com/original](http://www.philips.com/original)

A Philips está comprometida a ajudar e proteger nossos clientes de imitações pobres e de qualidade baixa, que podem avariar o veículo e ainda machucar os passageiros.

Garanta sempre que esteja comprando produtos originais Philips.

## Segurança

### Xenon Vision Ideal para substituição

- Qualidade e tecnologia de um Xenon original Philips.
- Tecnologia de troca unitária: a nova lâmpada combina com a temperatura de cor da lâmpada original.
- Escolha mais econômica.
- Temperatura de cor de 4300 K.
- A lâmpada Xenon Vision pode substituir uma lâmpada de Xenon queimada individualmente, visto que a temperatura de cor irá combinar com a lâmpada remanescente. Por esse motivo a linha Xenon Vision é considerada a ideal para substituição, pois é a escolha mais econômica. Dessa forma, você pode substituir somente uma lâmpada enquanto a temperatura de cor continua combinando com a lâmpada original.

# LED

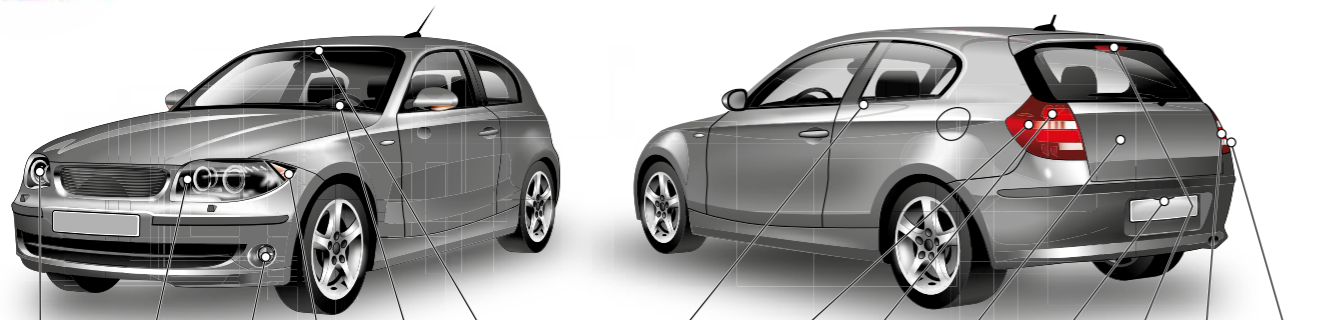

## Iluminação Automotiva em LED

Tecnologia **LED Retrofit** da Philips abre as portas dos benefícios do LED no carro. As lâmpadas de LED Retrofit têm a mesma base das lâmpadas convencionais, só que no lugar do bulbo comum possuem um LED de alta potência. Dessa forma, fica muito fácil trocar as lâmpadas de sinalização e luz interna por LED, sem a necessidade de adaptação elétrica.
